Sustainability Dashboard

Alur Data & Rumus Bisnis

Mill Onboarding · Supplier Due Diligence · Traceability
Valid dari codebase — tanpa perubahan kode aplikasi

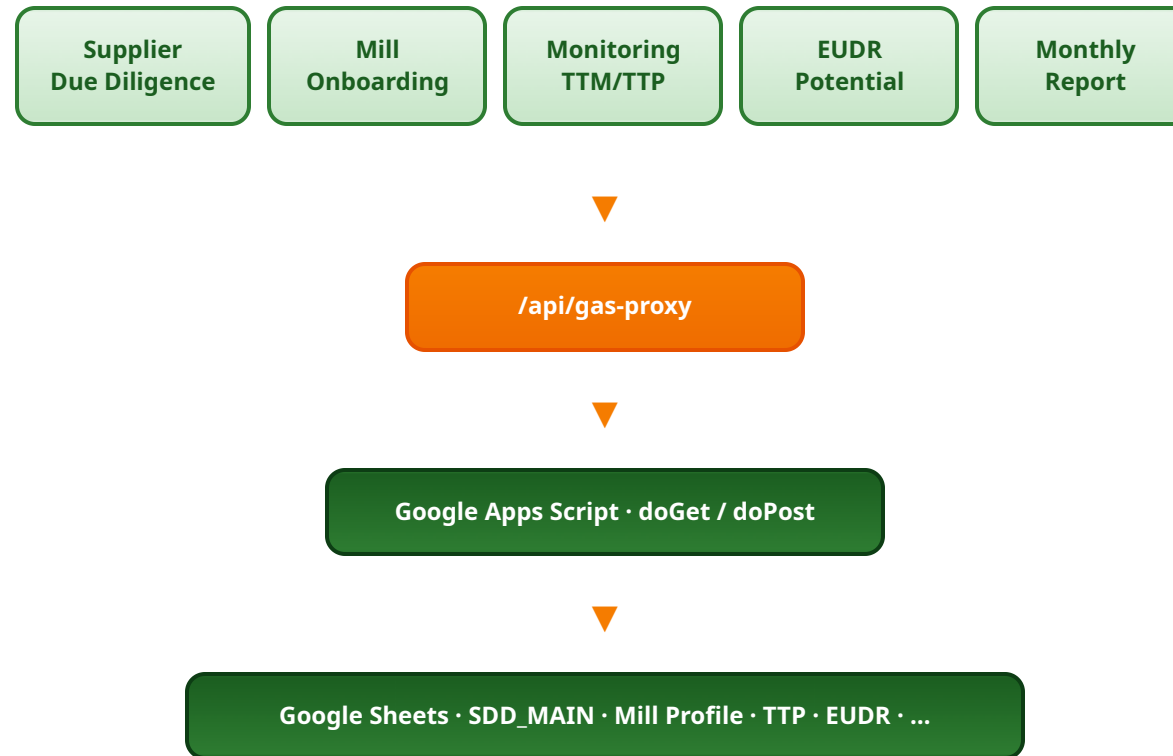

Daftar Isi

18 slide · alur data lengkap

● 01	Arsitektur Sistem	● 10	Rumus Google Sheet
● 02	Supplier Due Diligence	● 11	Rumus App (Frontend)
● 03	SDD Lifecycle	● 12	Grievance & Risk Reason
● 04	SDD → Kemana Data Mengalir	● 13	Peta Modul & Koneksi
● 05	Mapping SDD → Mill	● 14	Daftar Google Sheets
● 06	Mapping FFB → TTP	● 15	SDD vs EUDR DDS
● 07	Mill Onboarding Entry	● 16	Aturan Validasi
● 08	Mill Onboarding Output	● 17	Referensi File Code
● 09	Supply Task List		

01 · Arsitektur Sistem

Frontend → API Proxy → Google Apps Script → Google Sheets

Prinsip: Skor & risk level mill dihitung di Google Sheet. Web app tidak menulis kolom formula.

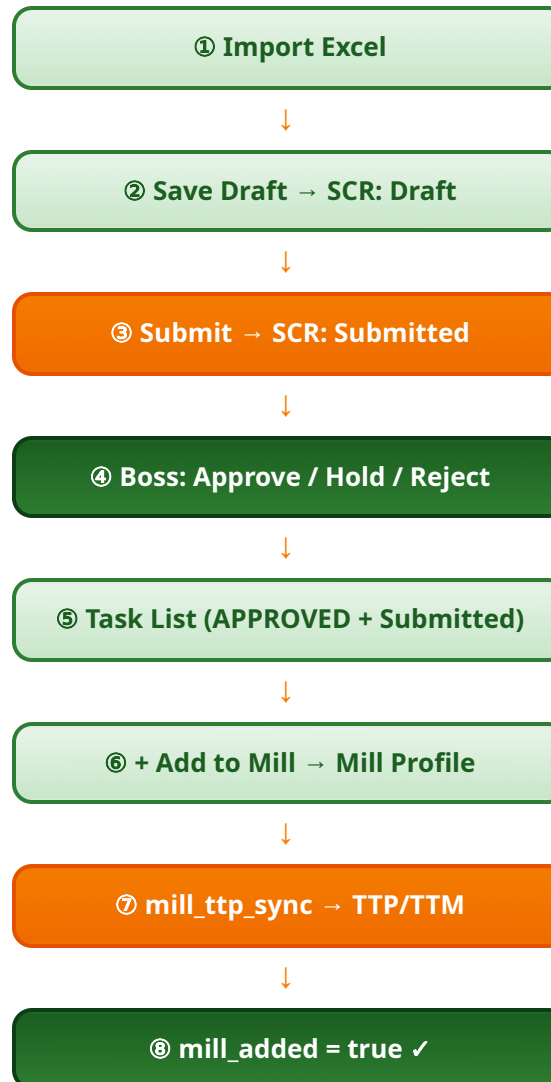

02 · Supplier Due Diligence (SDD)

Panel #panel-supplier-dd

- **STORAGE** SDD_MAIN · SDD_MILL_LIST · SDD_FFB_LIST
 - **KEY** submission_id (SUB-YYYYMMDD-XXXXXX)
 - **TYPE** MILL · KCP · TRADER
 - Upload Excel — Main Form + Traceability A/B
 - Screening form — SCR, GRV, PRI fields
- Approve / Hold / Reject (Boss decision)
 - NBL Check vs NBL & Unilever NBL sheets
 - Export PDF screening report
 - TML / FFB spatial screening (modals)
 - Legacy: SDD Data flat sheet (masih didukung)

03 · SDD Lifecycle

State machine — import hingga onboarding selesai

04 · SDD → Kemana Data Mengalir?

Trigger	Target Modul	Fungsi Backend
statusSDD = APPROVED	Contact List Supplier	syncContactFromApprovedSubmission_()
APPROVED + Submitted	Mill Task List	isApprovedSubmittedSddRow_()
Save Mill dari Task List	Mill Onboarding Profile	add / update sheet mill
mill_ttp_sync payload	Monitoring TTP/TTM	syncTtpFromMillOnboarding_*
NBL Check	SCR - No Buy List	runSddNblCheck()
Report period	Monthly Report \$01	fetchSddList()

05 · Mapping SDD → Mill Onboarding

mapSddRowToMillPayload() / mapSddTmlRowToMillPayload()

Kolom Mill	Sumber SDD
GROUP NAME	Group Name
COMPANY NAME	Company Name
MILL NAME	Mill Name / KCP Name / TML - Mill Name
COORDINATES	Latitude + Longitude (comma-separated)
MILL CAPACITY (TON/HOUR)	Mill Capacity (Ton/Hour)
SOURCE TYPE	MILL / KCP / TRADER
TRADER NAME / UML ID	Trader parent / TML - UML ID

06 · Mapping FFB → TTP/TTM

1 baris TTP = 1 pemasok FFB + konteks Main Form

Kolom TTP	Sumber SDD / Mill
GROUP / COMPANY / MILL NAME	Mill Onboarding identity
FFB SUPPLIER GROUP / NAME	FFB - Supplier Group/Name
CATEGORY · LAT/LONG · VILLAGE	FFB location & category fields
CONCESION / PLANTED AREA	FFB area fields
LEGALITAS · ISPO/RSPO/ISCC	FFB certification
FFB SUPPLY to MILL (TON)	FFB - Total Supply FFB (Ton)

Referensi lengkap: [docs/sdd-to-ttm-ttp-field-mapping.md](#)

07 · Mill Onboarding — Entry Point

Mill Profile (CPO/PK) · Mill Waste (POME/SHELL)

- **Manual Add/Edit**

Modal #btn-add-mill

- **SDD Task List**

"+ Add to Mill" dari approved screening

- **Supply Excel Import**

Upload → draft → submit

- CPO/PK → sheet **mill**

- POME/SHELL → sheet **millWaste**

- KCP plant → **FACILITY NAME PK**

- Refinery → **FACILITY NAME CPO**

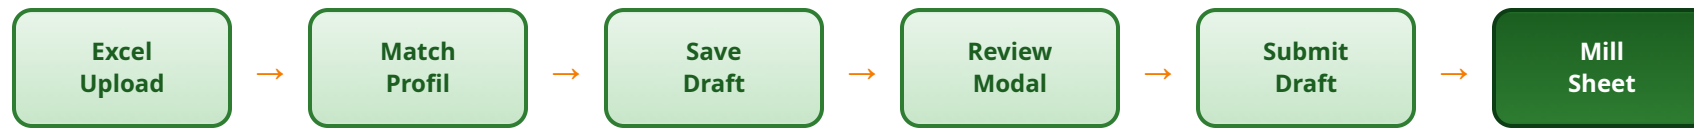

- Staging: **Supply Import Draft**

08 · Mill Onboarding → Output

Consumer	Join Key	Data Dipakai
Monitoring TTP/TTM	GROUP COMPANY MILL UML	Identity + FFB sync
Monthly Report §02	Period + risk level	High-risk MILL rows
Performa Facility	FACILITY NAME CPO/PK	Supply qty, traceability %
Questionnaire Monitoring	group company mill	Registry mill list
EUDR Potential	group company mill	Identity sync
Mill Executive Report	Quarter	Supply, NBL, certification

09 · Supply Task List

Embedded di Mill Onboarding panel

- match_status: **matched** · **new** · group_mismatch
- Formula columns di-restore dari baris atas — tidak di-overwrite
- Repair drift: **reconcileSupplyDraft_()**

10 · Rumus Google Sheet (Read-Only)

MILL_FORMULA_HEADERS_ — tidak pernah ditulis dari web

● SCORE · TOTAL SCORE · LEGALITY SCORE

● DEFORESTATION / BURN / PEAT SCORE

● TOTAL GRIEVANCES · POLICY · CERTIFICATION

● RISK LEVEL · RESULT RISK LEVEL

● BUYER NO BUY LIST · SUPPLIER STATUS

● PERCENTAGE SUPPLY CPO/PK/ISCC/INS/SHELL

● PRODUCT SUPPLY · STATUS SUPPLY CPO/PK

● TOTAL POME SUPPLY · MAX/REMAINING STOCK

● TOTAL SCORE SUPPLY · TOTAL RISK LEVEL

● SD Monitoring: DAY LEFT · Status · Result

11 · Rumus App (Frontend)

Dihitung di web app — bukan di Google Sheet

Grievance Risk Score

Total = Σ 6 indikator (skor 1–3)
 $\leq 8 \rightarrow$ Low · $\leq 11 \rightarrow$ Medium · $> 11 \rightarrow$ High
src/grievance-risk.js

TTP Aggregate %

$\Sigma(\text{traceable vol}) / \Sigma(\text{supply}) \times 100$
Fallback: avg kolom % TRACEABLE
ttpAggregateTotalTraceablePct_()

TTM Coordinate %

Pool: MILL/TRADER/REFINERY + supply > 0
 $\% = \Sigma(\text{qty traceable}) / \Sigma(\text{qty total}) \times 100$
ttpCalcTtmCoordinatePct_()

EUDR Potential Status

Semua kriteria enabled PASS $\rightarrow$ Potential
Satu fail $\rightarrow$ Not Potential
eudrComputeStatus_()

12 · Grievance & Mill Risk Reason

● **Grievance** — 6 indikator wajib sebelum klasifikasi

- Publish · Subject · Repeat · Consequence
- Group Scale · No Response

● **Mill Risk Reason** — pills dari gap field

- No Coordinate · Legality Not Complete
- Non APL · No NDPE · No Certification
- Deforestation > 0 ha · On No Buy List

13 · Peta Modul & Koneksi

14 · Daftar Google Sheets

Key	Tab Name	Modul
mill / millWaste	Mill Onboarding Profile / Waste	Mill Onboarding
sddMain/Mill/Ffb	SDD_MAIN / MILL_LIST / FFB_LIST	Supplier DD
ttp	Monitoring TTP/TTM	Traceability
grievance	Grievance Monitoring	Grievance
eudrPotential	EUDR Potential	EUDR
contactSupplier	Contact List Supplier	Contact List

15 · SDD vs EUDR DDS

Dua modul terpisah — tidak ada coupling langsung

Aspek	SDD (Supplier Due Diligence)	EUDR DDS
Panel	#panel-supplier-dd	#panel-due-diligence-statement
Storage	SDD_MAIN + child sheets	EUDR DDS + child sheets
Tujuan	Screening internal + onboarding	Paket export EU EUDR
Output	Task List → Mill → TTP	DOCX/PDF untuk buyer

16 · Aturan Validasi

Guard rules mencegah inkonsistensi data

- SDD Submitted tidak bisa downgrade ke Draft
- Task List: SCR = submitted AND statusSDD = APPROVED
- TTP sync: identity lengkap (GROUP/COMPANY/MILL/UML)
- Supply submit: match_status = matched atau new
- Mill save: kolom formula di-strip sebelum write
- EUDR: semua kriteria enabled harus pass
- Grievance: 6 indikator wajib sebelum klasifikasi
- Koordinat: normalizeCoordinate() + recoverCoord()

17 · Referensi File Code

Area	File
Backend CRUD + sync	scripts/GoogleAppsScript-backend-v3-full.gs
Main app logic	src/main.js
Grievance risk	src/grievance-risk.js
Mill risk reason	src/mill-risk-reason.js
Monthly report	src/monthly-report-ui.js · monthly-report-pdf.js
TTP field mapping	docs/sdd-to-ttm-ttp-field-mapping.md
