

Sustainability Dashboard

Dokumentasi Alur Data & Rumus Bisnis

Mill Onboarding · Supplier Due Diligence · Traceability

Sumber valid dari codebase — tanpa perubahan kode aplikasi

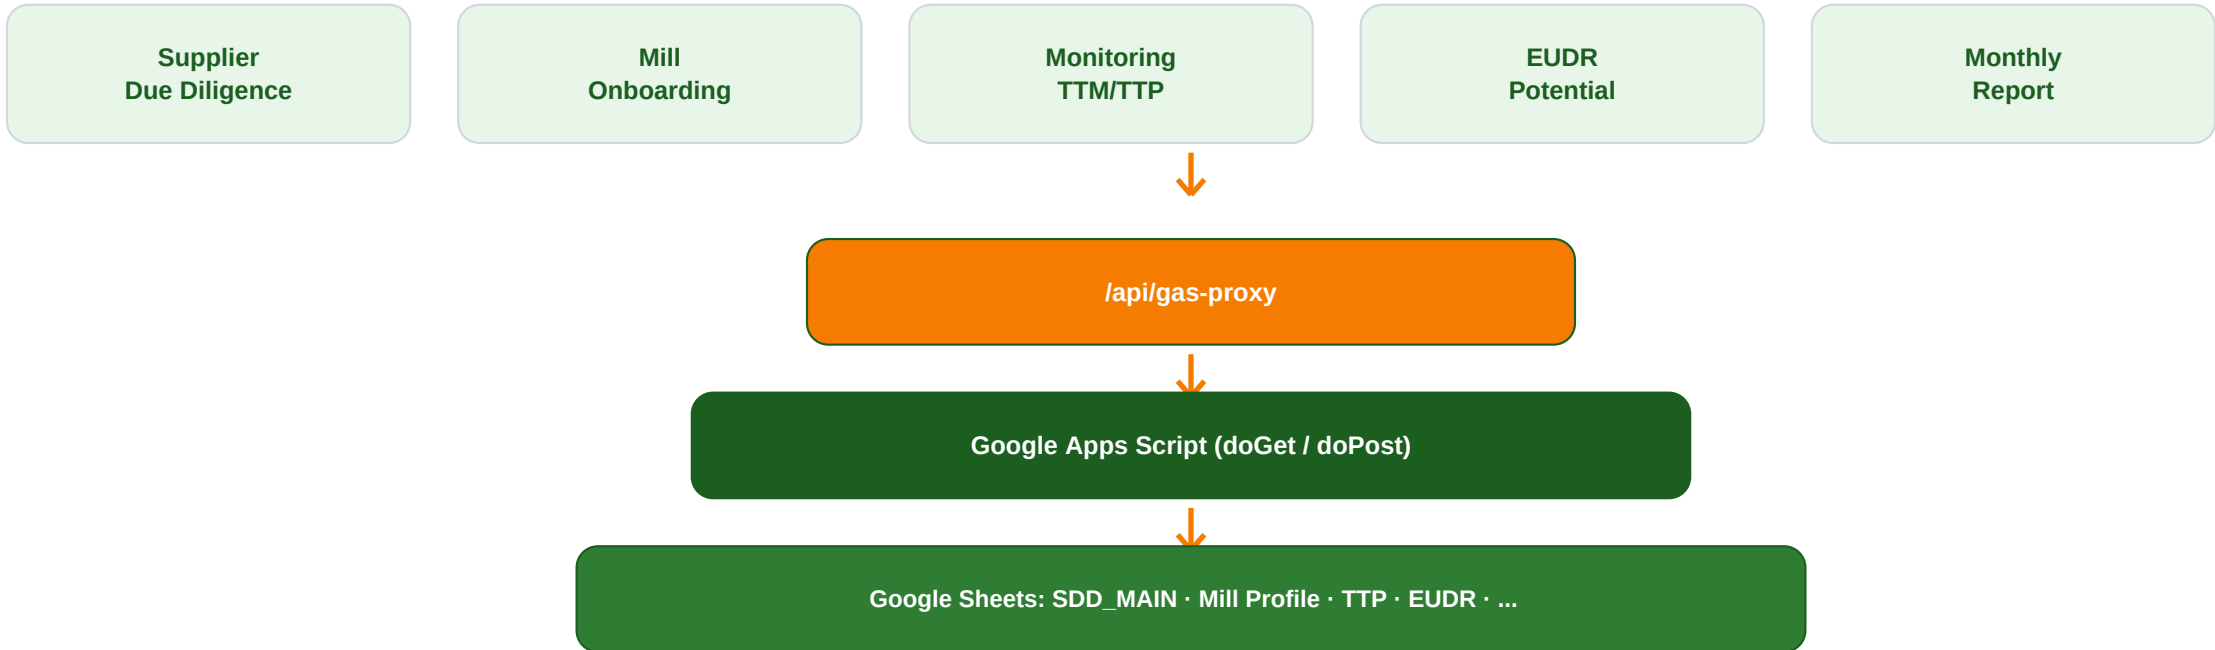

Daftar Isi

15 slide — alur data & rumus bisnis

- 1. Arsitektur Sistem
- 2. Supplier Due Diligence (SDD)
- 3. SDD Lifecycle (State Machine)
- 4. SDD → Kemana Data Mengalir
- 5. Mapping SDD → Mill Onboarding
- 6. Mapping FFB → Monitoring TTP/TTM
- 7. Mill Onboarding — Entry Point
- 8. Mill Onboarding → Output
- 9. Supply Task List
- 10. Rumus Google Sheet
- 11. Rumus App (Grievance · TTM · EUDR)
- 12. Peta Modul & Koneksi
- 13. Daftar Google Sheets
- 14. SDD vs EUDR DDS
- 15. Aturan Validasi

1. Arsitektur Sistem

Frontend → API Proxy → Google Apps Script → Google Sheets

Prinsip: Skor/risk mill dihitung di Google Sheet. Web app tidak menulis kolom formula.

2. Supplier Due Diligence (SDD)

Panel #panel-supplier-dd

- Penyimpanan: **SDD_MAIN** · **SDD_MILL_LIST** (Traceability A) · **SDD_FFB_LIST** (Traceability B)
- Primary key: submission_id (SUB-YYYYMMDD-XXXXXX)
- Supplier type: MILL · KCP · TRADER
- Entry point:
 - Upload Excel — Main Form + Traceability A/B
 - Screening form — SCR fields, GRV, PRI
 - Approve / Hold / Reject
 - NBL Check vs sheet NBL & Unilever NBL
 - Export PDF screening report

3. SDD Lifecycle

State machine dari import hingga onboarding selesai

Catatan: TTP sync terjadi SETELAH Mill disimpan — bukan saat approve SDD saja.

4. SDD → Kemana Data Mengalir?

Trigger · target · fungsi backend

Trigger	Target	Fungsi
APPROVED	Contact List	syncContactFromApprovedSubmission_
APPROVED + Submitted	Mill Task List	isApprovedSubmittedSddRow_
Save Mill	Mill Profile	add / update sheet mill
mill_ttp_sync	TTP/TTM	syncTtpFromMillOnboarding_*
NBL Check	SCR - No Buy List	runSddNblCheck()
Report period	Monthly Report §01	fetchSddList()

5. Mapping SDD → Mill Onboarding

mapSddRowToMillPayload() / mapSddTmlRowToMillPayload()

Kolom Mill	Sumber SDD
GROUP NAME	Group Name
COMPANY NAME	Company Name
MILL NAME	Mill Name / KCP Name / TML - Mill Name
COORDINATES	Latitude + Longitude
MILL CAPACITY	Mill Capacity (Ton/Hour)
SOURCE TYPE	MILL / KCP / TRADER
TRADER NAME	Nama trader parent
UML ID	TML - UML ID

6. Mapping FFB → TTP/TTM

1 baris TTP = 1 pemasok FFB + konteks Main Form

Kolom TTP	Sumber
GROUP / COMPANY / MILL	Mill Onboarding identity
FFB SUPPLIER GROUP/NAME	FFB - Supplier Group/Name
CATEGORY	FFB - Supplier Category
LAT / LONG	FFB - Latitude/Longitude
AREA / LEGALITAS / CERT	FFB fields
FFB SUPPLY to MILL (TON)	FFB - Total Supply FFB
submission_id	Metadata upsert

7. Mill Onboarding — Entry Point

Mill Profile (CPO/PK) · Mill Waste (POME/SHELL)

- **3 cara data masuk:**

- Manual Add/Edit — modal #btn-add-mill
- SDD Task List — '+ Add to Mill'
- Supply Excel Import — upload → draft → submit

- **Supply routing:**

- CPO/PK → sheet mill
- POME/SHELL → sheet millWaste
- KCP plant → FACILITY NAME PK
- Refinery → FACILITY NAME CPO

8. Mill Onboarding → Output

Consumer modules & join key

Consumer	Join Key	Data
TTP/TTM	GROUP COMPANY MILL	Identity + FFB
Monthly Report	Period + risk	High-risk mills
Performa Facility	Facility name	Supply, trace %
Questionnaire	group company mill	Registry
EUDR Potential	group company mill	Identity sync
Executive Report	Quarter	Supply, NBL, cert

9. Supply Task List

Embedded di Mill Onboarding

- match_status: matched · new · group_mismatch
- Formula columns di-restore — tidak di-overwrite
- Repair drift: reconcileSupplyDraft_()

10. Rumus Google Sheet

Read-only dari web — MILL_FORMULA_HEADERS_

- SCORE · TOTAL SCORE · LEGALITY SCORE
- DEFORESTATION / BURN / PEAT SCORE
- TOTAL GRIEVANCES · POLICY · CERTIFICATION
- RISK LEVEL · RESULT RISK LEVEL
- BUYER NO BUY LIST · SUPPLIER STATUS
- PERCENTAGE SUPPLY CPO/PK/ISCC/INS/SHELL
- PRODUCT SUPPLY · STATUS SUPPLY
- TOTAL POME SUPPLY · MAX SUPPLY
- REMAINING STOCK · TOTAL SCORE SUPPLY
- SD Monitoring: DAY LEFT · Status · Result

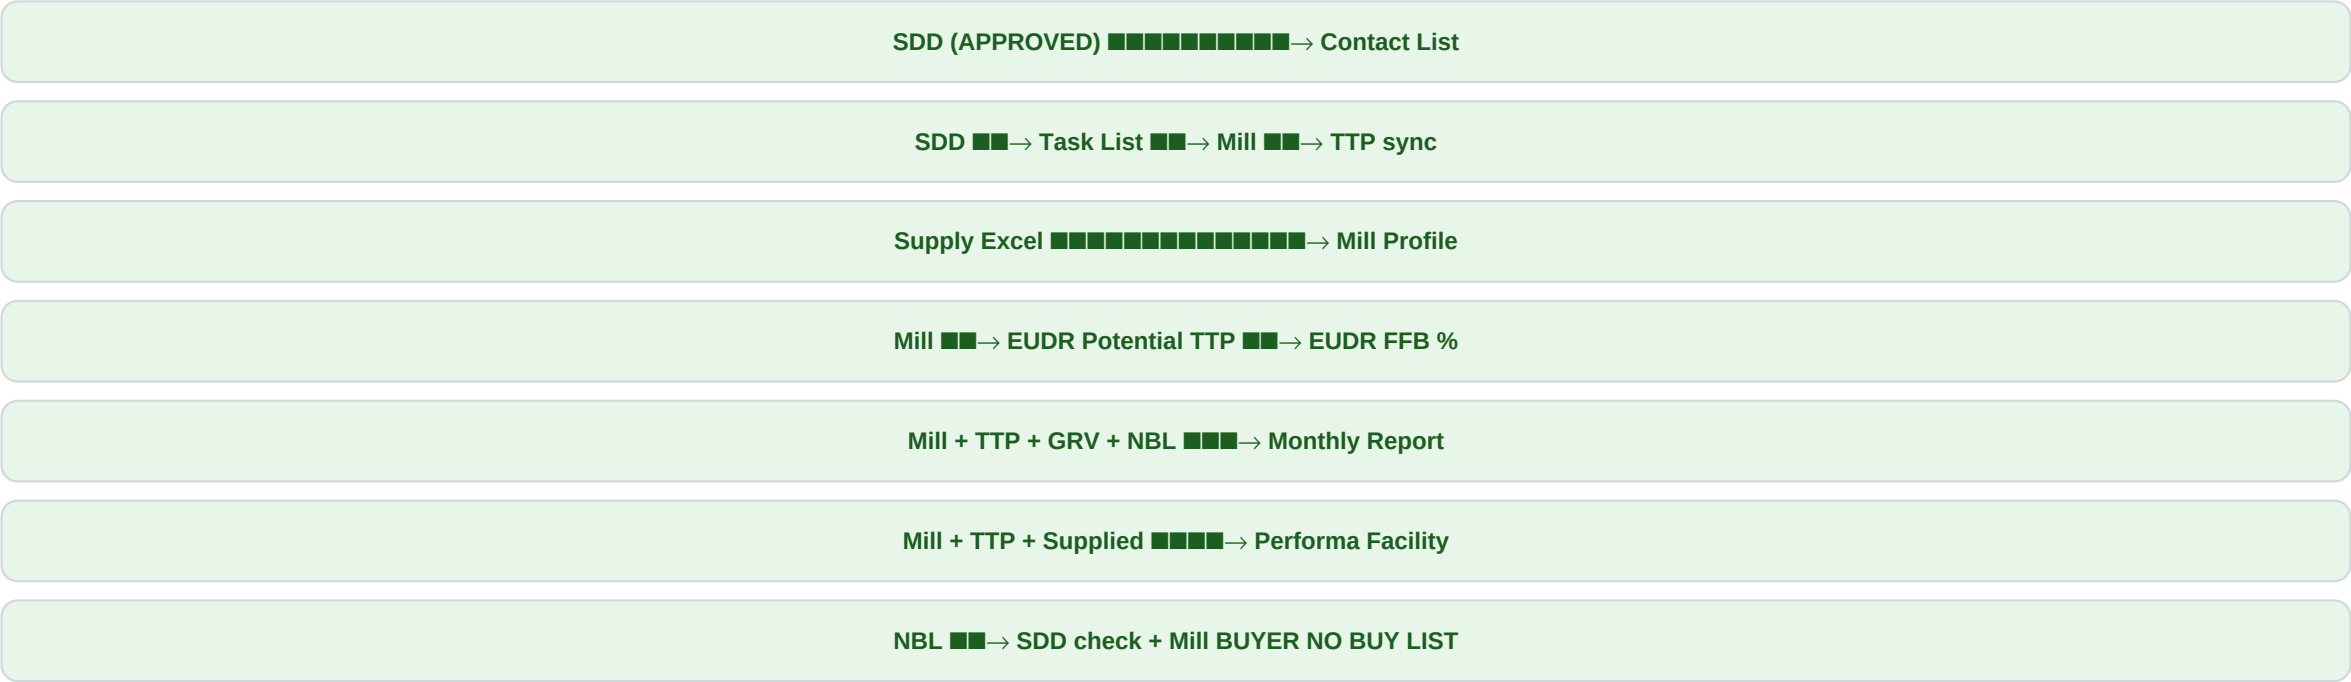

11. Rumus App (Frontend)

Dihitung di web app — bukan di sheet

Grievance Risk Total = Σ 6 indikator ≤ 8 Low · ≤ 11 Med · > 11 High	TTM Coordinate % $\frac{\Sigma(\text{qty traceable})}{\Sigma(\text{qty total})} \times 100$
TTP Aggregate % $\frac{\Sigma(\text{trace vol})}{\Sigma(\text{supply})} \times 100$	EUDR Status All criteria PASS → Potential

12. Peta Modul & Koneksi

Dependensi antar modul

13. Daftar Google Sheets

Database tabs per modul

Key	Tab Name	Modul
mill	Mill Onboarding Profile	Mill Onboarding
millWaste	Mill Onboarding Waste	Mill Waste
sddMain/Mill/Ffb	SDD_MAIN / MILL / FFB	Supplier DD
ttp	Monitoring TTP/TTM	Traceability
grievance	Grievance Monitoring	Grievance
eudrPotential	EUDR Potential	EUDR
contactSupplier	Contact List Supplier	Contact

14. SDD vs EUDR DDS

Dua modul terpisah — tidak ada coupling langsung

Aspek	SDD	EUDR DDS
Panel	supplier-dd	due-diligence-statement
Storage	SDD_MAIN + child	EUDR DDS + child
Tujuan	Screening + onboarding	Export paket EU
Output	Mill → TTP	DOCX/PDF buyer

Terima Kasih
